

Computer Repair Simulator

QUICK INSTALL GUIDE

Rev A (March 2018)

It is best to choose the right download for your usage. If you are an individual administrator with full access to your system, follow the Single User Installation details below. If you are a school, or facility which incorporates strict policies on the network, follow the Educational Installation.

Single User Installation:

We will assume you can run the software as administrator, and get by any User Access Control issues.

1. Download the .EXE or .ZIP version of the software
<http://computer-repair-simulator.com/alpha-game-downloads>
2. If you downloaded the .EXE, run the Installer
*Once installed, run the game using the desktop shortcut
- 2a. If you downloaded the .ZIP, extract the files anywhere on your PC
*Once extracted, create a shortcut of "Loader.exe" to your desktop from the CRS root folder, or run "Loader.exe"
3. Run the game, and it will check for updates, you may perform the updates or continue using the same version
4. To quickly test the game installation, click on "Quick Play" to make sure the software is fully operational.

Educational Installation:

We will assume your site has a local administrator who will perform the initial installation, but the end users do not have administrative rights, and the User Access Control is enabled.

1. Download the .ZIP version of the software
<http://computer-repair-simulator.com/alpha-game-downloads>
2. Extract the files anywhere on your PC (except in /Program Files or alike)
*Once extracted, create a shortcut of "Loader.exe" to your desktop from the CRS root folder, or run "Loader.exe"
3. Run the game, and it will check for updates, you may perform the updates or continue using the same version

4. To quickly test the game installation, click on "Quick Play" to make sure the software is fully operational.
